

ADISHARLAPALLI SOHAN PRASAD

sohanprasad2003@gmail.com — +91-7569842133 — GitHub — LinkedIn

PROFESSIONAL SUMMARY

Java Backend Developer with hands-on experience in building scalable microservices and cloud-native applications using Java, Spring Boot, REST APIs, Docker, Kubernetes, Kafka, and MySQL. Skilled in backend development, CI/CD pipelines, Helm Charts, and deployment automation with GitHub Actions, along with strong knowledge of Microservices Architecture and DevOps practices for developing secure and production-ready applications.

SKILLS SUMMARY

Languages: Java, JavaScript, SQL, C

Backend: Spring Boot, Spring MVC, Spring Security, REST APIs, Microservices, Spring Cloud

DevOps & Cloud: Docker, Kubernetes, Helm

Messaging & Observability: RabbitMQ, Apache Kafka, Grafana, Loki, Tempo, Prometheus, OpenTelemetry

Database & Tools: MySQL, Hibernate, JDBC, Git, GitHub, Maven, IntelliJ IDEA

Core Concepts: OOP, Data Structures, OS, Cloud-Native Applications

Web Technologies: HTML, CSS

Soft Skills: Problem Solving, Team Collaboration, Communication

PROJECTS

- **Kaatha – Grocery Credit & Transaction Management System:** (*HTML, CSS, JavaScript, Java, Spring, MySQL*)
 - Designed and developed a real-time application for shopkeepers to manage customer-wise grocery borrowings, supporting detailed transaction histories and accurate outstanding balance calculations.
 - Streamlined grocery lending and billing processes, enabling shopkeepers to track multiple customers simultaneously and minimize errors in manual calculations.
 - Strengthened application security by implementing controlled access and input validation, resulting in a 30% improvement in protection against unauthorized data access.
 - Improved overall code maintainability by restructuring business logic into modular and reusable components, enabling faster debugging and easier feature enhancements.
- **Hostel Management System:** (*HTML, CSS, JavaScript, Java, Spring, MySQL*)
 - Developed a centralized hostel management platform allowing owners to manage student profiles, room allocation, hostel strength, payments, and daily operational activities efficiently.
 - Enhanced emergency response readiness by maintaining hosteler blood group information and enabling direct communication through live chat and automated email notifications.
 - Improved hosteler engagement and administrative efficiency by providing dashboards for complaint tracking, daily menu feedback, room details, and real-time status updates.
 - Integrated automated notifications and reminders for payments, complaints, and menu updates, reducing manual follow-ups by 40%.
- **Mini Projects:** (*Java, MySQL*)
 - **Employee Management System:** Built a CRUD-based Spring MVC application with secure login and registration workflows, improving input accuracy by 40% and reducing authentication errors by 25%.
 - **Java Server–Client Communication System:** Developed a socket-based client-server architecture and optimized I/O stream communication, achieving 30% faster response efficiency and 25% reduced latency.
 - **Java JDBC Application:** Implemented JDBC-based applications to perform optimized CRUD operations, enhancing database interaction speed and reliability under dynamic data loads.

EDUCATION

Vidya Jyothi Institute of Technology
B.Tech – Computer Science & Engineering (AI & Data Science)

Hyderabad, India
CGPA: 8.11 | 2023–2026 (May)

St. Mary's Engineering College
Diploma – Computer Science Engineering

Deshmukh, Hyderabad
CGPA: 8.39 | 2020–2023

CERTIFICATIONS

DBMS Course – Scaler Academy — October, 2023
Data Structures in Java – Udemy — December, 2023
Spring Boot – Udemy — July, 2025

DECLARATION

Place: Hyderabad

I hereby declare that the details furnished above are true and correct to the best of my knowledge.

(A. Sohan Prasad)
