PROFESSIONAL SUMMARY

Java Backend Developer with hands-on experience in Java, Spring Boot, MySQL, and REST APIs. Built projects involving microservices, authentication, and workflow automation. Strong foundation in Data Structures, Algorithms, OOP, DBMS, and Operating Systems. Seeking Software Engineer and Java Backend Developer opportunities to apply and enhance my technical skills.

SKILLS SUMMARY

Programming Languages: Java, SQL, JavaScript, C

Backend Development: Spring Boot, Spring MVC, Spring Security, REST APIs, Microservices, Spring Cloud

Databases: MySQL, Hibernate, JDBC

Messaging & Distributed Systems: Apache Kafka, RabbitMQ

Tools & DevOps: Git, GitHub, Maven, Docker, Kubernetes

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, DBMS

Web Technologies: HTML, CSS, JavaScript

Soft Skills: Problem Solving, Team Collaboration, Communication

PROJECTS

• Kaatha – Smart Grocery Credit & Billing Management Platform:

(HTML, CSS, JavaScript, Java, SpringBoot, Microservices, SpringCloud, Docker, MySQL)

- Developed a microservices-based billing platform to manage customer credit, transactions, and payment records across independently deployable services.
- Implemented automated balance calculation and credit reconciliation functionality to maintain accurate customer credit and payment tracking.
- Secured REST API endpoints using Spring Security with role-based access control (RBAC) to protect customer and billing data.
- Containerised services using Docker and configured service discovery using Spring Cloud for efficient inter-service communication.

• Hostel Management System: (HTML, CSS, JavaScript, Java, SpringBoot, MySQL)

- Developed a web-based hostel management system for administrators and residents with secure authentication and role-based access control.
- Implemented room allocation and availability management features, enabling administrators to monitor occupancy and efficiently assign rooms.
- Built fee payment and tracking functionality with automated email notifications for payment confirmations, reminders, and important hostel updates.
- Developed blood donor and complaint management modules, allowing residents to quickly find suitable donors and track complaint resolution status.

• Mini Projects:

- Employee Management System (Spring MVC, MySQL):** Developed a CRUD-based employee management application with authentication, employee record management, and server-side validation.
- Java Server–Client Communication System (Socket Programming):** Built a client-server application using Java sockets to enable real-time communication and data exchange.
- Java JDBC Application (MySQL):** Developed a JDBC-based application to perform CRUD operations and manage persistent data in a MySQL database.

EDUCATION

Vidya Jyothi Institute of Technology

B.Tech – Computer Science & Engineering (AI & Data Science)

Hyderabad, India

CGPA: 8.33 | 2023–2026

St. Mary's Engineering College

Diploma – Computer Science Engineering

Deshmukh, Hyderabad

CGPA: 8.39 | 2020–2023

DECLARATION

Place: Hyderabad

I hereby declare that the details furnished above are true and correct to the best of my knowledge.
