

ADISHAR LAPALLI SOHAN PRASAD

Hyderabad, Telangana, India | +91-7569842133 | [E-Mail](#) | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Java Backend Developer with hands-on experience in building scalable backend applications using Java, Spring Boot, Microservices, Spring Security, and MySQL. Skilled in developing secure REST APIs with JWT Authentication and Role-Based Access Control (RBAC). Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, and Operating Systems, with a passion for developing efficient and reliable software solutions.

EDUCATION

B.Tech – Computer Science & Engineering (AI & Data Science) | 2023 – 2026

Vidya Jyothi Institute of Technology, Hyderabad | CGPA: 8.33 / 10.0

Diploma - Computer Science Engineering | 2020 - 2023

St. Mary's Engineering College, Hyderabad | CGPA: 8.39 / 10.0

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript

Frameworks & Technologies: Spring Boot, Hibernate, REST APIs, Microservices

Databases: MySQL, JDBC

Messaging & Distributed: RabbitMQ

DevOps & Tools: Git, GitHub, Maven, Docker, Kubernetes (Basics), Postman, Swagger/OpenAPI, IntelliJ IDEA, VSCode

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), SDLC, Exception Handling, RBAC

PROJECTS

Kaatha - Smart Grocery Credit & Billing Management Platform | <https://github.com/sohan91/Kaatha-App>

Tech Stack: HTML, CSS, JavaScript, Java, Spring Boot, Microservices, Spring Cloud, Docker, MySQL, JWT, Spring Security

- Designed and implemented a **microservices-based grocery credit management platform** for shopkeepers and customers using **Java, Spring Boot, Spring Cloud, API Gateway, Eureka Server, and MySQL**.
- Engineered an advanced **JWT-based authentication** system with **RBAC** for REST APIs, establishing unique user workflows for distinct roles and subsequently improving user satisfaction scores by 25% in customer feedback surveys.
- Engineered independent microservices for **Authentication, Customer Management, Shopkeeper Management, Kaatha Transactions, and Payment Tracking**, enabling scalable and modular application architecture.

- Built REST APIs using **Spring Data JPA** and **Hibernate** for customer onboarding, credit/debit transactions, payment history, and outstanding balance tracking, with inter-service communication using **OpenFeign**.

Hostel Management System | <https://github.com/sohan91/Hostel-Management-System>

Tech Stack: Java, Spring Boot, Spring Security, MySQL, HTML, CSS, JavaScript

- Engineered a **microservices-based Hostel Management System** to manage student registration, room allocation, fee management, and complaint handling using **Spring Boot**, **Spring Cloud**, and **REST APIs**.
- Implemented **JWT-based authentication** and **Role-Based Access Control (RBAC)** to provide secure access for Admin, Warden, and Student modules.
- Designed backend services using **Spring Data JPA**, **Hibernate**, and **MySQL**, enabling efficient data storage, retrieval, and communication between microservices.
- Validated REST APIs using **Postman**, managed source code with **Git** and **GitHub**, and followed layered architecture and clean coding practices throughout development.

Employee Management System | <https://github.com/sohan91/Employee-Management-System>

Tech Stack: Java, Spring, MySQL, JDBC

- Built an **Employee Management System** using **Spring MVC**, **JDBC**, and **MySQL** to perform secure CRUD operations with form validation and authentication.
- Architected a layered architecture for efficient employee record management, ensuring seamless database integration and maintainable code.

Java Server-Client Communication System

[Java-Programs/Networking/ServerProject_GroupChat at master · sohan91/Java-Programs](#)

Tech Stack: Java, Socket Programming

- Engineered a **client-server communication system** using **Java Socket Programming** to enable real-time bidirectional message exchange.
- Managed **TCP socket communication** and multithreading to handle multiple client connections concurrently and ensure reliable data transfer.

Java JDBC - Data Persistence Application

[Java-Programs/JDBC/JDBC_Poject/JavaCRUDProj at master · sohan91/Java-Programs](#)

Tech Stack: Java, JDBC, MySQL

- Built a **Java JDBC application** to perform CRUD operations on a **MySQL** database using **JDBC** and **Prepared Statement**.
- Optimized transaction management and exception handling to ensure reliable database operations and data consistency.

TECHNICAL PROFILES

- **GitHub:** github.com/sohan91 — 10+ personal and academic repositories including microservices, REST APIs, and backend projects.
- **Competitive Programming:** 150+ problems solved on LeetCode in Java.
