## PROFESSIONAL SUMMARY

---

Java Developer with hands-on experience building production-style backend systems using Spring Boot 3.5, Microservices architecture, Docker, and Spring Security. Delivered two full-stack projects featuring JWT authentication, role-based access control, RESTful web services, and containerized deployment. Proficient in Data Structures and Algorithms with strong foundations in OOP, DBMS, and Operating Systems. Available to join immediately and actively seeking Java Backend or Software Engineer roles.

## TECHNICAL SKILLS

---

**Languages:** Java 17, SQL, JavaScript, C

**Backend Frameworks:** Spring Boot 3.5, Spring MVC, Spring Security, Spring Data JPA, Spring Cloud, RESTful, Microservices

**Databases:** MySQL, Hibernate ORM, JDBC, JPA

**Messaging & Distributed:** Apache Kafka, RabbitMQ

**DevOps & Tools:** Git, GitHub, Maven, Docker, Kubernetes, Postman, Swagger/OpenAPI, IntelliJ IDEA, VS Code

**Core CS:** Data Structures & Algorithms, OOP, Operating Systems, DBMS

**Web & APIs:** HTML5, CSS3, JavaScript, JSON, XML, REST, HTTP

## PROJECT EXPERIENCE

---

### Kaatha – Smart Grocery Credit & Billing Management Platform

*HTML, CSS, JavaScript, Java, Spring Boot 3.5, Microservices, Spring Cloud, Docker, MySQL, JWT, Spring Security*

- Architected a microservices-based billing platform with 3+ independently deployable Spring Boot services, enabling modular management of customer credit, transactions, and payment records.
- Implemented JWT-based authentication and Spring Security RBAC, securing 10+ RESTful API endpoints and restricting access to sensitive billing data by user role.
- Built automated credit reconciliation logic that eliminated manual balance errors, ensuring real-time payment accuracy across all customer accounts.
- Containerised all services using Docker and configured Spring Cloud Eureka for service discovery, enabling zero-downtime deployments and reducing inter-service latency.

### Hostel Management System

*Full-Stack Developer — Java, Spring Boot, Spring Security, MySQL, HTML, CSS, JavaScript*

- Developed a full-stack hostel management platform with JWT authentication and role-based access control across administrator and resident modules serving 100+ users.
- Built room allocation and real-time occupancy tracking features, enabling administrators to efficiently manage 100+ room assignments.
- Automated fee payment notifications using Java MailSender, sending email alerts for confirmations and due reminders – reducing manual admin follow-up by approximately 80%.
- Engineered a blood donor matching module and complaint lifecycle tracker, enabling real-time resolution visibility and cutting administrator response time significantly.

### Additional Projects

*Java, Spring MVC, MySQL, JDBC, Socket Programming*

- **Employee Management System:** CRUD application with Spring MVC, server-side validation, authentication, and role-based employee record management using MySQL.
- **Java Server-Client Communication System:** Real-time bidirectional data exchange between client and server using Java socket programming.
- **Java JDBC:** Data persistence that performs full CRUD operations on a MySQL database using JDBC.

## TECHNICAL PROFILES

---

**GitHub:** [github.com/sohan91](https://github.com/sohan91) — 10+ personal and academic repositories including microservices, REST APIs, and backend projects

**Competitive Programming:** 150+ problems solved on LeetCode in Java

## EDUCATION

---

- **Vidya Jyothi Institute of Technology, Hyderabad**  
*B.Tech – Computer Science & Engineering (AI & Data Science)*
- **St. Mary's Engineering College, Hyderabad**  
*CGPA: 8.39 — 2020–2023*

*CGPA: 8.33 — 2023–2026*  
*Diploma – Computer Science Engineering*

## CERTIFICATIONS

---

- Spring Boot 3 & Microservices — Udemy
- Spring Security — Udemy
- SQL and Relational Databases — Scalar
